Deliverable Title	Methodology Implementation of RE Education in JO		
Author(s)	Abdallah Al-Zoubi, Wejdan Abu El-Haija, Suhil Kiwan and Bashar Hammad		
Organisation Name(s)	PSUT, JUST and HU		
Deliverable No.	1.1		
Deliverable Type	Methodology		
WP Number	1		
WP Leader	JUST		
Due Date of Delivery	15/02/2013	Project Month 4	
Submission Date	15/02/2013	Project Month 4	
Dissemination Level	National Level		
Total Number of Pages	17		

A meeting was held on 24 December 2012, 8:30 am at **Princess Sumaya University for Technology**, in order to discuss DEV1.1: "Methodology Implementation of RE Education in JO" of the MUREE TEMPUS project which aims at providing a scoping and needs analysis exercise to investigate the current status quo of renewable energy in Jordan. The meeting was attended by Abdallah Al-Zoubi, Wejdan Abu-El-Haija, and Sanad Kawar from PSUT, Suhil Kiwan, JUST and Bashar Hammad, Hashemite University.

The participants agreed to commence the investigation will with desk research and prepare a survey and conduct interviews with appropriate stakeholder, focusing on all academic programmes being in offer in the field of renewable energy, actual market demands, and trends and needs as well government policies and regulations.

The meeting commenced with a discussion of the surveys that Dr. Suhil Kiwan has provided the team by email, and the feedback and comments which were sent back to Dr. Kiwan. 4 surveys were already prepared, as shown in Appendices 1-4, two targeting the renewable energy companies operating in Jordan and Europe and two targeting academic institutions involved in teaching renewable energy specialties in Jordan and Europe. During the meeting, Dr. Wejdan Abu-El-Haija suggested to have another questionnaire targeting power and energy engineers in

Jordan. The main purpose of these questionnaires is to provide proper data for the report which is going to be prepared and discussed in the Graz workshop which aims at designing 4 RE traditional courses, 2 eLearning courses and 4 remote labs. Three of the traditional courses will be offered in all partner universities in Jordan at the departmental level and 1 course will be taught as an elective at the university level since it would be difficult to offer a course as a college elective.

The purpose of the surveys was to provide an output for the design of these courses according to market and society needs.

The following was agreed upon:

• Three surveys will be prepared and interviews will be conducted by 31 December 2013:

1. Survey targeting companies with at least a sample of 40 companies hoping to reach a sample of 30. Mr. Sanad Kawar will create a database of these companies by 10th of January 2013 and interviews will be conducted by 10 February 2013.

Two teams at JUST and MUTAH will assist in conducting these interviews in the North and South parts of the kingdom respectively.

2. Survey targeting universities which offer renewable energy programs and courses with at least a sample of 20 institutions hoping to reach a sample of 15. Dr. Bashar Hammad will create a database of these universities by 10 January 2013 and interviews will be conducted by 10 February 2013.

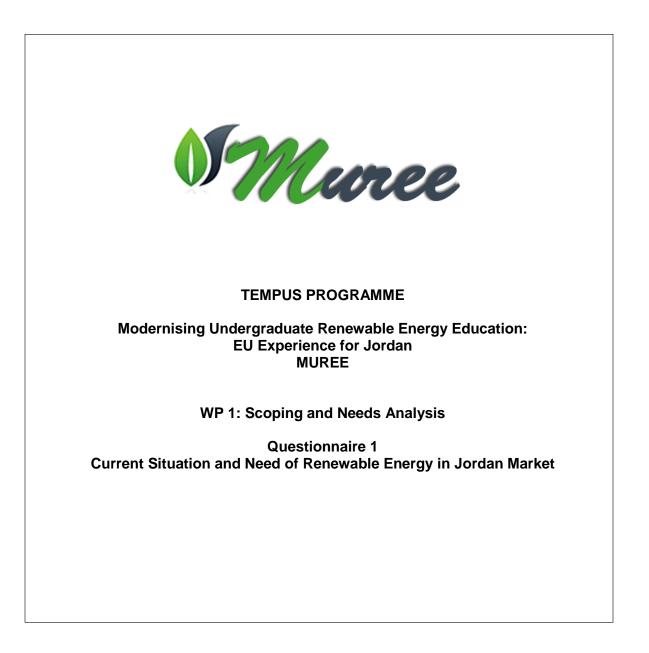

3. Survey targeting engineers with at least a sample of 150 companies hoping to reach a sample of 100. Mr. Feras Shadid will use the database at the Jordan engineering Association to follow up the questionnaire by 10 February 2013.

• Dr. Kiwan will take the responsibility of analyzing the results of the three surveys by 20 February 2013 and preparing the draft report by 30 March 2013. Meeting ended at 10am.

Appendix 1

Introduction Brief introduction of the project and purpose of the interview...

1. General Information about the Organization

3. Labor Market

How do you recruit professionals in	Company website
REEE?	Direct recruiting
	Specialized agencies (e.g)
	From Jordanian Universities
	International Graduates
	Others
From your company experience,	

how do you rate the "availability of	Easily Available
qualified professionals" for the	Occasionally available
REEE area in the Jordanian Labor	Not Available
Market?	
For the type of activities your	No difficulty
organization is conducting in the	Lack of technical expertise
field of REEE, what are the HR	Lack of management expertise
professional and technical skills	Lack of financial and economic
you find most difficult to identify in	Lack of qualifications in general in the area of
the current labor Market?	REEE
	Lack of expertise in the economics and policy of
	REEE
	Others
In terms of recruiting, what are the	
prospects for your organization in	Recruit more
the REEE area in the short term	Remain constant
(next 2 year)?	Negative (reduce staff)
	Don't know
If you plan to hire more staff, what	Engineers (Basic Disciplines such as Mechanical,
are the target professional levels	Electrical, Materials, Industrial, Chemical,
you will be considering?	Mechatronics)
	Engineers (with specialization in REEE)
	Multidisciplinary qualifications
	Technicians / vocational qualifications
	R&D staff
	Sales and Marketing
	Others

4. Training needs

Do you offer training to your	Yes No
employee in REEE?	
Do You prefer in-house training?	Yes No
If there are training programs at the	Yes No
Universities, are you willing to	
train you staff there?	
Most effective long-life learning	Seminars
techniques in RE field are	tutorials
	Workshops
	Shorts courses
	Online courses
	Professional certificates
With regard to the type of activities	Design
your organization is conducting in	Modelling
the field of REEE, what are the HR	Simulation

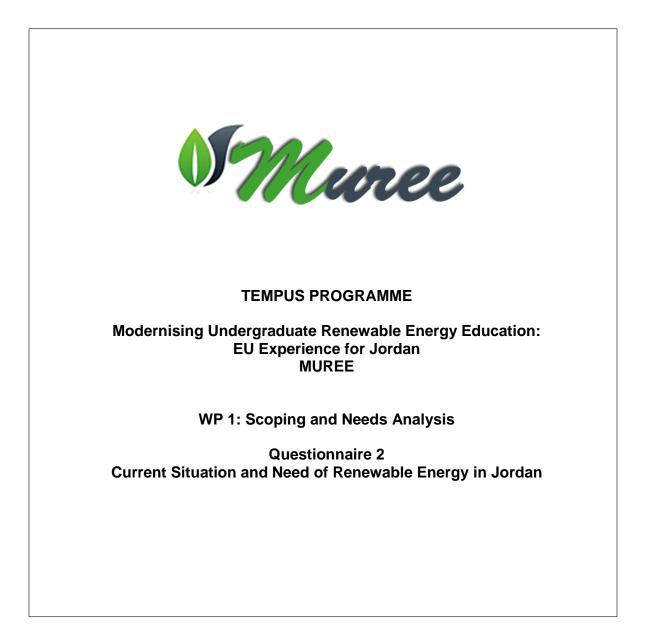

competencies / expertise you find	Analysis
most important for the growth of	Installation
your business?	Maintenance
	Troubleshooting
	Energy Auditing
	Hybrid Systems
	Smart Grid
	Others, Specify
With regard to the wider	Design
application of REEE in Jordan,	Modelling
what are the HR competencies /	Simulation
expertise that are needed and	Analysis
currently missing from the local	Installation
labor market?	Maintenance
	Troubleshooting
	Energy Auditing
	Hybrid Systems
	Smart Grid
	Others, Specify
With regard to the wider	Solar Energy; thermal application
application of REEE in Jordan, in	Solar Energy: PV systems design and simulation
what REEE topics the HR expertise	Solar Energy; controllers design
are needed the most for the local	Solar Desalination
labor market?	Wind Energy; techno-economic field
	Wind Energy; design and simulation
	Biogas
	Biomass
	Hydro power
	Ocean Energy
	Wave Energy
	Tidal Energy
	Hydrogen Production by RE
	RE Energy Storage
	Socio-economic field
	RE Energy Management
	Others, specify
	Others, speenry

5. When carrying out your activities in the field of REEE, are there recurring difficulties in the dialogue/communication with other stakeholders / actors? If yes, what kind of professional profile could improve this dialogue?

Appendix 2: Questionnaire 2, Teaching, experimental and management facilities in the Jordan universities

To be filled by each of the **partner** Universities in Jordan. Non-partner Universities may skip parts 1 and 6.

1. Faculty and Research staff working in REEE area:

In the following table, please fill in the names, rank and areas of interest of current research and teaching staff currently working directly or indirectly within REEE area (if you need more space use the back of the form):

Name	Academic Rank	Area of Specialization within RE	Teaching Activities (courses)	Research Activities/ Interest

2. Current Education offered in REEE area:

In the following table, please list courses or course modules (part in another course) within REEE area. This may include engineering, policy or economics courses. Kindly attach corresponding course syllabus.

Course / Module Title	Department/ Faculty	Level (year 1, 2,, master level, etc.)	Mandatory/ Elective	Average number of students taking this course

3. Dedicated units/centers working with REEE at your university:

Name of Center/Unit	
Focus Area	
Number of affiliated faculty	
Annual operating budget	
Example of output	
Outreach activities	

4. Laboratories and Equipment

a. In the following table please describe the type of facilities currently available for students and researcher in the area of REEE, e.g. performance measurements, monitoring equipment and instruments, demonstration stations, prototyping units, simulation software etc.:

Type of facility	Dedicated to: (e.g. SHW, PV, Wind, Biogas)	Instruments/ Software (e.g. Pyranometers, flow meters, temp. sensors, data loggers)

b. In the following table please list and describe the kind of equipment/laboratories including simulation software that are needed to better fulfill current and ongoing research and education activities within REEE:

Type of facility	Dedicated to: (e.g. SHW, PV, Wind, Biogas)	Instruments/Software (e.g. pyranometers, flow meters, temp. sensors, data loggers)

5. Outreach activities

Please detail if the university engages in any outreach activities with industry/society on any of the REEE areas? E.g. consulting to industry, policy studies, training, joint research projects, awareness raising)

Activity	Target Audience	Output

6. Research project

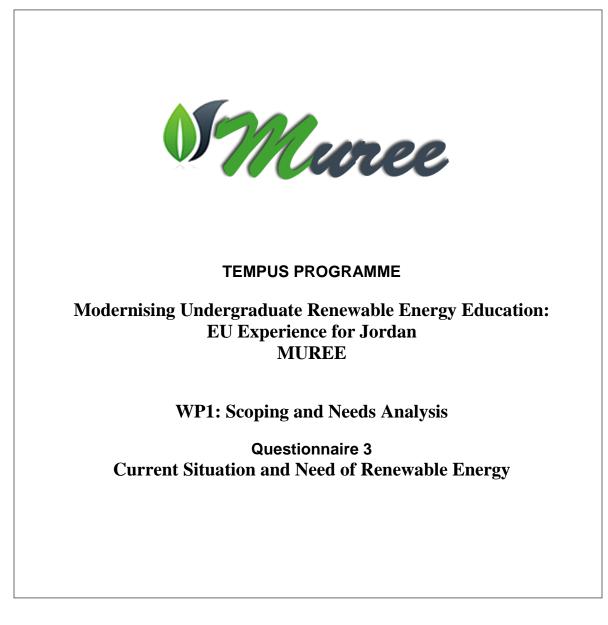

In the following table please list recently completed or ongoing research projects in the area of REEE including doctoral and/or master thesis projects, size and source of funding, local or international collaboration partners and output in terms of publications, books or reports:

Project	Description	Estimate budget and source of funding	Output

APPENDIX 3

Introduction Brief introduction of the project and purpose of the interview ...

Organization Name	
Type of organization	(e.g. public, private, gov., NGO)
Contact Person & Position	
Contact Details	
Main Activities	Sales and Marketing
(Please select all those that apply to the	Consulting / Engineering / Design
activities of the organization)	Energy Policy
	Capacity Building / Training
	Research and Development
